

Press Release

RADIODATA GmbH and Kapsch CarrierCom AG launch cooperative partnership.

Vienna, Berlin, September 4th, 2018 – RADIODATA and Kapsch CarrierCom have announced a close cooperative partnership promising high-quality, customized, and economical radio solutions for joint customers. The focus is on the implementation and support of radio networks for rail and other public transportation systems, as well as for utilities and authorities requiring complex trunked radio systems with high standards of security.

Both partners have many years of experience in their respective sectors: RADIODATA as manufacturer, developer, and supplier of radio technology for professional applications; Kapsch CarrierCom as a global system integrator, implementing and operating high-quality end-to-end communications solutions. Together, the partners serve and develop the international market for Digital Mobile Radio (DMR) projects and benefit of each other's know-how. Furthermore, this cooperation also enables Kapsch CarrierCom to integrate RADIODATA products into Kapsch solutions and to develop additional applications designed to meet sector-specific requirements.

RADIODATA GmbH,

a medium-sized company founded in 1981 by development engineers in Berlin, develops and implements complex systems for the professional mobile radio (PMR) market. In addition to public authorities (German PPDR), the customer base also includes various companies of different size in the Energy sector, Industry, Public Transport, Mining and other market segments.

The Digital Professional Radio system DIPRA®, developed by RADIODATA is based on the ETSI specification for Digital Mobile Radio (DMR) supporting both conventional and trunking operation mode.

Kapsch CarrierCom

Kapsch CarrierCom, a Kapsch Group company, is a global developer of end-to-end telecommunications solutions. Kapsch's innovative technologies, products and services cover the entire value chain, from planning and development to construction and operational management. Kapsch CarrierCom is a leading Global System for Mobile Communications-Railways (GSM-R) expert. In addition, the company offers a broad portfolio that includes Private Mobile Radio (PMR) networks based on Terrestrial Trunked Radio (TETRA) and Digital Mobile Radio (DMR) standards. Its international customers include leading railway operators, energy suppliers, public authorities, transport operators, and airports.

Kapsch CarrierCom invests intensively in research and development and is significantly involved in the development of the next generation of broadband solutions for mission-critical networks, for instance as an associated member of the European research initiative Shift2Rail.
